 Orthopaedic Surgery & Sports Medicine  
 Otolaryngology  
 Palliative Care  
 Physical Medicine & Rehabilitation  
 Pulmonology  
 Rheumatology  
 Trauma Surgery

# Many Minds. One Group.

Buse Sengul, MD, is a neurologist and neuroimmunologist at Memorial Neuroscience Institute. She specializes in caring for patients with multiple sclerosis and neuroimmunologic disorders, such as neuromyelitis optica, stiff person syndrome, neurosarcoidosis, acute disseminated encephalomyelitis (ADEM) and transverse myelitis.

Dr. Sengul completed medical school in one of the biggest MS centers in Turkey and then completed additional training at Temple University in Philadelphia, where she had the chance to care for patients with complex cases. She went on to complete MS-focused training at the University of Florida.

When working with patients, Dr. Sengul is thorough, learning about the first presentation, current symptoms, as well as about their life in general, so she can begin to understand their goals for treatment.

Dr. Sengul encourages all patients to advocate for their health and educates them about their diagnosis and/or disease so they can work together to make joint decisions about their care.

Before joining Memorial, Dr. Sengul was a neurologist and neuroimmunologist at Cleveland Clinic Florida in Weston. She also served as the associate program director for the neurology residency program and a clinical assistant professor at Florida International University Herbert Wertheim College of Medicine.

## **BUSE SENGUL, MD** **DIRECTOR, NEUROLOGY RESIDENCY PROGRAM** **NEUROLOGIST & NEUROIMMUNOLOGIST**

- Fellowship:
  - Multiple Sclerosis – University of Florida, Gainesville, Florida, 2019
- Residency:
  - Neurology – Temple University Hospital, Philadelphia, Pennsylvania, 2018
- Internship:
  - Internal Medicine – Temple University Hospital, Philadelphia, Pennsylvania, 2015
- Medical Education:
  - Dokuz Eylul University School of Medicine, Izmir, Turkey, 2013
