Rheumatology
Trauma Surgery

Many Minds. One Group.

Mohamed Nasser, MD, is a board-certified neurologist at Memorial Neuroscience Institute where he cares for patients with various neurological diseases. His clinical interests are epilepsy and neurophysiology with a focus on seizure semiology, epilepsy pharmacology and surgical planning.

After witnessing many patients who are desperate because their lives have been harmed by seizures, Dr. Nasser became driven by the potential to return their quality of life with careful diagnosis and treatment.

Living with epilepsy is about much more than just seizures. Dr. Nasser is committed to promoting the health of his patients and advocating for their well-being by not only treating the disease but also allowing them to be in control of their lives again and providing appropriate counsel.

MOHAMED NASSER, MD NEUROLOGIST
