Kidney Transplant  
Nephrology  
Neurology  
Neurosurgery  
Orthopaedic Surgery & Sports Medicine  
Otolaryngology  
Palliative Care  
Physical Medicine & Rehabilitation  
Pulmonology  
Rheumatology  
Trauma Surgery

# Many Minds. One Group.

Chao-wen Lee, MD, is a cardiologist at Memorial Cardiac and Vascular Institute. She evaluates and treats patients with cardiac-related conditions such as coronary artery disease, cholesterol issues and blood pressure problems. She also evaluates patients to see if symptoms such as chest pain and shortness of breath are related to cardiac issues. She particularly enjoys helping patients take prevention measures to reduce the risk of having a cardiac event or experiencing a recurrent cardiac event.

As a clinical cardiologist for nearly 30 years, Dr. Lee works personally with patients to figure out the potential causes of their health ailments. Diagnostic work is like detective work - it requires a lot of listening, time to understand fully what the patient is experiencing and sorting through the myriad of details in the background of medical knowledge and expertise. After she has a better idea of a potential cause of a problem, Dr. Lee develops a plan to help them feel better.

Dr. Lee earned her medical degree at Case Western Reserve University. She then completed an internal medicine residency at the University of Chicago and a cardiology fellowship at the Cleveland Clinic. Before joining Memorial, she worked in the private sector as well as at an academic health center.
